

Stop Mobile Chernobyl -- Senate bill 1240 NO FUKUSHIMA FREEWAYS in IL!

Your U.S. Senators need to hear from you -- NO high-level radioactive waste shell game!

The **Nuclear Waste Management Act of 2013, S. 1240** would set up so-called "temporary" storage sites for high level radioactive waste (HLRW) from nuclear power reactors with no guarantee of a permanent disposal site. If storage is centralized that means the waste will move twice, doubling the potential for transport accidents.

"To or through," Illinois has become a target for the unnecessary transport and storage of HLRW. A 2012 study done at Oak Ridge National Lab suggests that Illinois would be the ideal FIRST candidate for these "parking lot dumps" – adding as

much as 9,000 more tons to Illinois' present 9,000+ ton inventory of HLRW.

The legislation also mandates a "volunteer" system. Would your community WANT to be the nation's temporary or permanent garbage dump for highly radioactive waste?

CALL NOW -- 202-224-3121 (Capitol Switchboard); or, call Sens. Durbin (202-224-2152) and Kirk (202-224-2854). Tell them: **Oppose S. 1240!** Sign-on-line at: <http://www.nirs.org/>.

We have **NO** confidence in NRC's "waste confidence"!

- **THE ISSUE:** a Federal court removed the NRC's ability/authority to take *any* license action that expands production of irradiated fuel rods. This includes granting a license for a new reactor, or extending the license for an operating reactor. The courts no longer accept without hard proof (better technical analysis) NRC's long-standing verbal "waste confidence mantra" that a permanent radioactive waste disposal solution would "someday" be found; and ordered NRC to conduct such study before it would reinstate NRC's licensing authority.

• **WHAT WE WANT:** a law/statement that UNLESS and UNTIL permanent isolation of the existing waste from the biosphere has been demonstrated, and a disposal facility sited, there should be ***no confidence*** in licensing further waste production, and NRC should not have authority to do so. We don't build skyscrapers without bathrooms. We shouldn't let the nuclear industry and NRC operate without one, either.

- **WHAT YOU CAN DO:** 1.) make plans to **attend and testify** at one of the 12 upcoming public meetings NRC is scheduling nationwide to take public comment on this "waste confidence" rule. Dates and locations will be posted to the NEIS website Calendar, **Chicago meeting, Nov. 12th**; 2.) **E-mail comments** opposing NRC's waste confidence to: Rulemaking.Comments@nrc.gov, citing Docket ID No. NRC-2012-0246

70,000+ tons of high level radioactive waste and no place to permanently put it. It is not safe and the Nuclear Regulatory Commission wants to keep stockpiling it in our communities for over 100 years.
